

MS Powder Systems

POWDER HANDLING

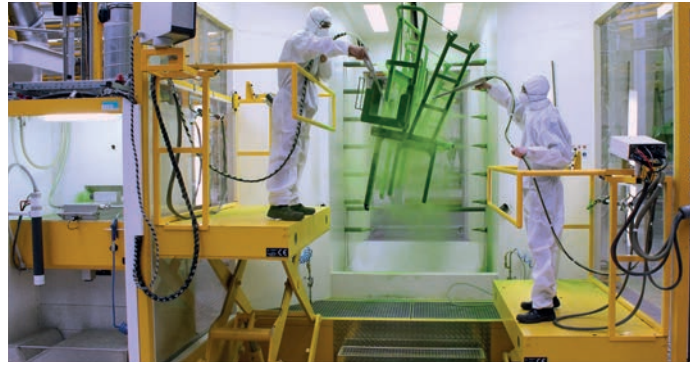

With an increasing number of colour options, greater product diversity and requirements for smaller production batches; an increasing level of flexibility is demanded by companies from their powder coating systems.

Powder coating solutions from MS Powder Systems take their customers' demands very seriously by offering a range of modular products which can be optimally customised to the users' requirements. In this way, solutions from MS Powder Systems offer greater system efficiencies, a better cost-benefit ratio and rapid return on investment.

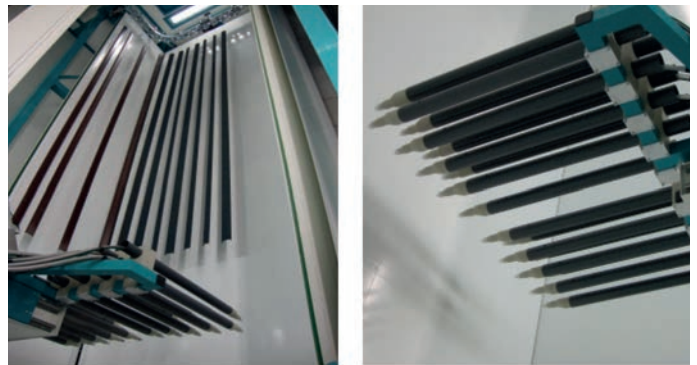

FCC Fast Colour Change System - Improves productivity through decreasing colour change time from 12 to 6 mins during recovery operation.

FCO Open Powder System - Fast colour change system designed for large and awkward shaped work pieces.

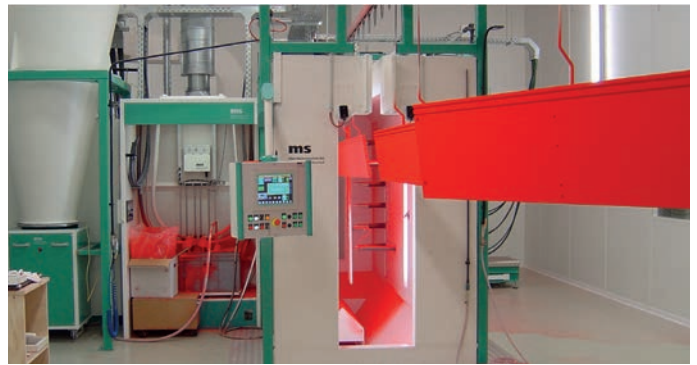

FCH Horizontal Powder System - Horizontal system for glass or flat coating.

FCV Vertical Powder System - Vertical fast colour change system for profiles' coating.

FCB Belt Powder System - Fast colour change system for clean room applications. Cleaning by suction system.

MDF Wood Coating - Complete coating and curing system with gas catalytic infrared oven.
